

CORPORATE BROCHURE

PLASTICS SOLUTIONS

WITHOUT
LIMITS

Injection Molding

CNC Machining

Custom Fabrication

Cast Urethane

Compression Molding

Rubber Capabilities

THE RANGE OF OUR
CAPABILITIES ARE
LIMITLESS

ANYTHING IS POSSIBLE
WITH DPI AS
**YOUR
PARTNER**

No matter your part, material, application, or industry, **we'll find the best solution for your situation.**

Our team includes plastics engineers as well as materials and production innovators – ready to collaborate and bring their areas of expertise to your challenge.

Whether you need custom-engineered components, in-house prototyping, injection molded pieces with unique shapes or features, or efficient production for short runs and high-volume programs to reduce costs, DPI can make it happen.

A TRUSTED EXTENSION OF YOUR TEAM

A full range of plastics manufacturing
and production processes under one roof.

COMPREHENSIVE CAPABILITIES

Bending and Thermoforming	Overmolding of Steel Parts
CNC Machining	Product Assembly
Custom Fabrication	Prototype Production
Custom QC Testing	Routing
Drilling	Spin Welding
Gluing and Joining	Stamping, Labeling Parts ID
Injection Molding	Steel Welding and Machining
Injection Molding UHMW-PE	Thermoforming
Installation of Metallic Inserts	Urethane Casting
MultiFab Hybrid	Vacuum Forming
Components™ Solutions	Vapor and Standard Part Polishing

You are experts in
your product – **let DPI
be your experts in
all things plastics.**

WHY CUSTOMERS TURN TO DPI

Engineering, Evaluation, and Collaboration

We'll work with you to solve applications needs and performance goals. We can evaluate current parts for improvement in design, engineering, manufacturing, and durability.

Plastics Materials and Application Expertise

Beyond our expertise in the hundreds of polymer types available, we also know their unique characteristics and how specific polymers and composites might deliver your best solution.

Manufacturing Process Knowledge

With extensive experience and an in-depth understanding of plastics manufacturing processes, we'll devise the right approach to producing your parts and achieving your objectives.

Cross-Industry Insights

Having served customers across the U.S., we can offer solutions in industries from aerospace and automotive to agriculture, consumer goods, food processing, lumber processing, and water treatment.

ON-SITE DESIGN ENGINEERING

Using creativity, collaboration, and a progressive mindset, **we solve challenges no one else can.**

With an in-house team representing a range of engineering disciplines and having extensive experience with plastics, you can rely on us to develop innovative solutions for any situation.

We can also incorporate custom resins, additive packages, and color matches to ensure you have the right plastics for the job.

CONCEPT TO CREATION

From first ideas to finished products, we are your most comprehensive plastics parts manufacturer. We have all the capabilities in house to envision, create, and bring your plastics part solutions to reality.

DPI INNOVATION AT WORK:

MULTIFAB HYBRID COMPONENTS

Blending the best in materials and manufacturing processes to deliver optimum part performance.

Our MultiFab Hybrid Components approach allows us to bring together the right polymers with the capabilities of our fabrication, machining, injection molding, and polyurethane casting departments to produce truly innovative part solutions.

MultiFab brings it all together for a single, superior part.

THE RANGE OF PARTS WE CAN INJECTION MOLD WILL INSPIRE NEW IDEAS

Known for our proprietary **UHMW-PE injection molding process** you'll only find at DPI, we also deliver engineered plastics components across a wide range of sizes, resins, and performance demands.

Why machine it when you can mold it?
Get the benefits of injection molded parts and components:

- Savings of cost, labor, and time
- Precision production and quality control
- Multi-component mold capabilities
- Custom additives and colors
- Guaranteed molds protect your investment

QUALITY AND VALUE FOR THE LONG RUN

Competitive pricing and responsive service is our promise.

LET'S SOLVE IT

The impact that a new plastics part can have on the big picture might surprise you. So don't hesitate to share your challenges with DPI. We'll listen, collaborate, and find the solution.

Discover more about our production capabilities, products, and the industries we serve.
