STUB  
SHAFTS?

CLEARLY BRILLIANT!

Giving You One More  
Innovative Reason  
**To Go Plastic For Your  
Equipment's Key  
Components.**

Stub Shafts, or as some OEM sources call them, Spindles, are critical components in the overall scheme of water treatment operations. With New Cast Urethane Stub Shafts from Diversified Plastics, you can count on this essential part to be more readily available with **shorter lead times to fulfillment**. Plus, our new stub shafts **align with all industry standard sprockets and static sleeve bushings**. So the choice is clear.

## The Advantages of Cast Urethane For Stub Shafts

If you have been purchasing metal or cast nylon stub shafts, you will quickly discover the distinct advantages our industrial grade cast urethane parts will provide:

- **Shorter Lead Times**...up to half the amount of time from order to fulfillment
- **Custom Colors and Private Labeling Available**...we can match your color schemes and branding into the parts we make for you
- **Aligns with all industry standard sprockets and static sleeve bushings**... steel reinforced for proper form, fit, function
- **Maintains shape and alignment with minimal deflection**...stands up to rigorous wear and tear
- **Provides enhanced water and chemical resistance over cast nylon**...eliminates concerns about misalignment of chains due to swelling
- **All standard sizes available**... 12", 18" and 24" sizes

# A Decade Of Proven Performance

## In The Water Treatment Industry

Over the past decade, Diversified Plastics has become a leading provider of non-metallic sprockets and many other plastic components to the Water Treatment industry. Our New Cast Urethane Stub Shafts are our latest in a long line of high-quality parts engineered and produced specifically to provide superior performance in Water Treatment equipment. In fact, the parts we produce for our OEM manufacturers, and as replacement parts for our aftermarket users, are meeting and exceeding customer expectations for durability, fast turnaround delivery and overall performance on the job.

To introduce our new Cast Urethane Stub Shafts, we're offering special, limited time pricing.

Bundle our new Stub Shafts with our proven Idler Sprockets and Static Sleeve Bushings and save on your combined order.

Visit our website to see all of the engineered plastic parts we manufacture for the Water Treatment Industry.
