DPI Can Design Engineered
Plastic Components to Meet
Your Poultry Processing
Needs.

Our Proven Poultry Processing Components Perform Better, Longer, And At Less Cost... The Secret Comes From Our Proprietary Multi-Fab Technology™

Diversified Plastics provides the following:

- A variety of FDA materials that deliver high chemical, heat, and wear resistance
- Wide range of Durometers (hardness) can meet all requirements
- Carbon and stainless steel core tubes
- Abrasion resistant nylon end plugs
- Custom molds for non-standard sizes
- Metal detectable plastic resins for injection molded parts

Manufactured in the USA

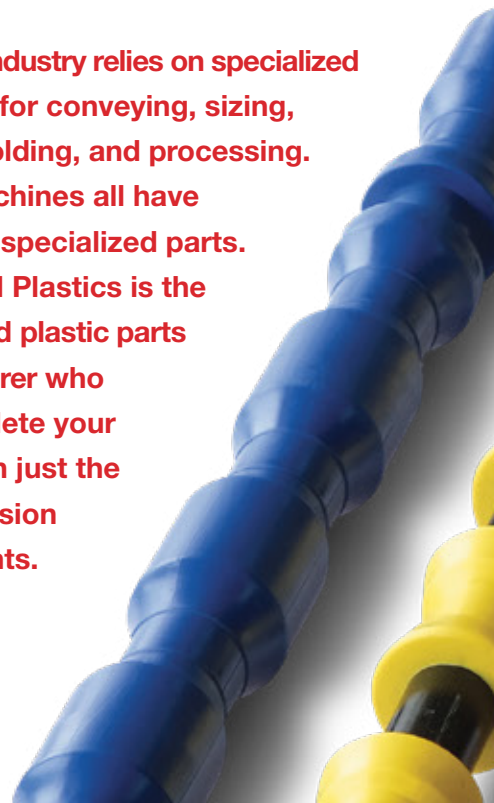

If you are a poultry processing machine producer and need a supplier of parts for your machines, **you'll find no finer manufacturer than Diversified Plastics.**

We are specialists in making OEM and replacement parts for the food processing industry. Our precision parts are made out of a variety of materials such as acetal, nylon, UHMW and FDA-approved elastomers. Some of our engineered parts include:

- Egg Rollers
- De-boners
- Shackle turning blocks
- Cones
- Trolley wheels
- Re-hang carriers
- Hock cutter lugs

Plus, we can custom mold and produce parts for any special machine application.

The food industry relies on specialized machines for conveying, sizing, sorting, holding, and processing. Those machines all have dozens of specialized parts. Diversified Plastics is the engineered plastic parts manufacturer who can complete your needs with just the right precision components.

It's time you found out more. Contact us.
